## TC-Split grinding discs

### Product Description

TC-Split grinding discs - or also called WiDia grinding discs - (WiDia = Like Diamond) offer powerful performance, both on dry and wet materials. Due to the optimal soldering of the tungsten carbide grains on the metal discs, the highly wear-resistant, double-sided abrasive tool lasts up to 150 times longer, is far more effective and time-saving than conventional abrasive paper discs.

### Product Details

- Available in the following dimensions:  
Ø 380 / Ø 400 / Ø 430 mm with inner star cut Ø 25 mm  
Thickness of carrier disc 0.5 mm (fine) and 0.8 mm (medium and coarse)
- Available in following versions (approx. grain sizes):  
Fine (1.0 - 1.2 mm) / Medium (1.5 - 2.0 mm) / Coarse (2.5 - 3.5 mm) /  
Very Coarse (4.0 - 6.0 mm) and Extra Coarse (6.0 - 8.0 mm)
- Use on single-disc / single-plate polishing/grinding machines with a rotation of 140 to max. 170 rpm. (Use on a grinding disc preferably in conjunction with a rubber pad or sponge rubber and pyramid mat as double mat).
- Product features:
  - Can be used on both sides
  - Long tool life / highly wear-resistant due to optimal brazing
  - High removal rate due to scattered, sharp-edged and protruding carbide grit
  - Surface: copper coloured
- Fields of application: For solid or tough substrates for removing adhesive and covering residues such as joint compounds, filler, plaster, carpet and paint residues. Suitable for sanding and roughening substrates such as concrete floors and screeds. Can be used on: Paint, cement, plaster, brick, linoleum, etc. **Note:** Sprinkle soft adhesive residues with quartz sand before sanding. This largely reduces clogging of the grinding disc!
